Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. The species best illustrated by the specification page 10, starting in line 25.
- II. The species best illustrated by the specification page 11, starting in line 10.
- III. The species best illustrated by the specification page 11, starting in line 19.
- IV. The species best illustrated by the specification page 12, starting in line 5.
- V. The species best illustrated by the specification page 12, starting in line 16.
- VI. The species best illustrated by the specification page 12, starting in line 26.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species **AND IDENTIFY WHICH CLAIMS ARE DRAWN THERETO**, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is deemed generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. No telephone call was made to request a telephone election because of the complexities of the issues at hand (see MPEP 812.01).

IDS

5. An Information Disclosure Statement was filed by the Applicant on 7-20-01 containing 102 non-patent literature references. However, review of the image file wrapper shows that these references are missing from the image file wrapper. Consequently, the Applicant is respectfully requested to resubmit copies of those references with the reply to this Office Action so as the cited IDS references can be considered.
